

Profile

Hi. My name is Yunus Talay.

I'm currently studying frontend development at Noroff - school of technology and digital media. I'm curious and enthusiastic. I've been interested in computers as long as I can remember. Ever since I started studying at Noroff my interest for web-design has increased day by day. I've been lucky enough to learn important fundamentals about UX design, and I have become quite obsessed with the relation between UX design and frontend development. So much, that I'm planning to take a year of UX studies after my current degree is finished. I feel dedicated to keep working in these two fields, and hopefully be able to learn a lot and grow as a an individual.

As these areas complements my studies, i am keen to gain more experience. For this reason, i am looking for a company willing to offer me a placement among their team of Frontend developers. In return, I would offer my full commitment and try my best to be a pleasant addition to your team.

Education

2013-2017

Bachelor degree in History and Religion at University of Stavanger
