Profile

Hi! My name is Yunus Talay.
I'm currently studying frontend development at Noroff - school of technology and digital media. I'm curious and enthusiastic. I've been interested in computers as long as I can remember. Ever since I started studying at Noroff my interest for development has increased day by day. I've been lucky enough to learn important fundamentals about UX design, and I have become quite obsessed with the relation between design and development. I feel dedicated to keep working hard in this field, and hopefully be able to learn a lot and grow as an individual.

I am keen to gain more experience. For this reason, I am looking for a company willing to offer me a placement among their team of frontend developers. In return, I would offer my full commitment and try my best to be a pleasant addition to your team.
